1. Manufacturer certification:

The company was founded on the basis of one of the oldest (one of the first) manufacturers of specialized equipment for road construction. Since 2008, this company has been an independent manufacturing company supplying parts and components to China's leading road construction machinery manufacturers, while also being one of the few manufacturers of all-terrain wheeled cranes.

This company has a production center divided into three production areas, occupying a total area of approximately 18,000 m². The number of employees specialized in engineering and technicians is 200, and the workforce is estimated at approximately 600 people.

In addition, this company has the corresponding accreditation as established by government regulations and has the necessary licenses to carry out its activities legally and responsibly.
